Capability Statement

www.verocomm.com

Aclipsa's main offering is **The VEROCOMM Network**, a Mobile Management System (MMS) cloud based platform with an iOS and Android brand-able mobile app, that enables companies to reach and teach its workforce anywhere by delivering videos, documents, and communications directly to mobile devices. Verocomm has the capability to set deadlines, verify viewing of content, and manage compliance with e-signature for records management and reporting. Verocomm's Messenger feature allows users to create and send messages, video, and photos via the app empowering your workforce to plan, scope, report, and communicate critical information for workflow optimization wherever they may be. And if you need content, Verocomm's VCNstore contains a library offering hundreds of safety and training titles to choose from. All this in one easy to use system that connects your entire organization at the speed of mobile while saving time and money.

CORE COMPETENCIES

- Verocomm Network platform enabling communications, content delivery and tracking user activity on mobile devices
- SaaS secure video delivery system which can be added into any other mobile app

PAST PERFORMANCE

Michels Corporation

Location: Brownsville, WI

Date: January 2017

- Adopted Verocomm platform to enable organization to communicate with employees in remote locations to deliver critical communications, safety, training and more. This filled the gap of how to reach and teach people that are decentralized across its operations and in remote areas and provide a solution for strategy to incorporate and leverage mobile device use.

XSP

Location: Las Vegas, Nevada

Date: January 2012

- Utilized our SaaS technology to enable private and secure delivery of information to its members only.
